

TANK INSTALLATION CHECKLIST

The following must be completed before the tank installation can be done:

1. Approved credit application.
2. Tank loan agreement in our office signed by you.
3. Free site survey performed by trained Guttman Oil professionals. At this time we will quote any installation costs and schedule the install. *Customers purchasing an underground tank should schedule the excavation for the tank.*
4. Mark the spot where you want the tank. It must be at least 10 feet from the house, and no more than 85 feet from the driveway.
5. 3/4" black iron pipe from the furnace, threaded, 4" outside the house, at least 18" off the ground.
6. Furnace must be installed with electricity connection made.
7. Our certified service technician will deliver the tank, make all outside connections, and check the system for leaks.
8. A full propane delivery will be made after the tank installation is complete.
